

Concord Crossing East has two types of lots available. The standard single family lot comprises most of the lots available in the Community. Our single family neo-traditional lots are fewer and smaller in size.

The single family neo-traditional home will have a monthly maintenance fee assessed to handle the grass cutting and sidewalk snow removal. The lots are generally a narrower lot than the standard single family lots thus making the homes longer and narrower. Homes on these lots will face the addressed street but have garages access via an alleyway behind the home.
